

Passing a module/Compensation

For the clinical practice modules all module components must be passed at 40 per cent. All

Reassessment of failure
S

Passing a module/compensation

All module components must be passed at 40 per cent, except the clinical assessments and case presentation which is 50% as per the module specifications. All zero-credit (pass/fail) components must be passed. No compensation is available.

Reassessment of failure

Students are only allowed one reassessment attempt per module.

Failure of a module due to gross professional misconduct will result in immediate dismissal from the programme.

Students must maintain contractual services with the designated service provider for the duration of the programme. If they fail to do so they will be suspended pending investigation and may be terminated from the programme.

Attendance

Each module has a 100 per cent attendance requirement for taught content. The clinical practice element has an 80 per cent attendance requirement. If a student falls below these requirements they must demonstrate that they have completed any missed work.

Passing a module/Compensation

All module components must be passed at 40 per cent. In some instances, this is 80 per cent (e.g. OSCE assessments). No compensation is available.

Reassessment of failure

A student will have a maximum of 90 credits of reassessment opportunities at each level of study.

Progression between undergraduate levels of study 841.92 reW*nBT/F2 11.04 T53 rg0.502 0.525 dg0.3 3

Progression route to level 1 registration for registered nursing associates (2 year)

Passing a module/Compensation

All module components must be passed at 40 per cent. In some instances, the components can be higher than 40%. These are specified on the module specifications. All apprentices are required to achieve a health numeracy assessment related to nursing proficiencies and calculation of medicines which must be passed with a score of 100% by the end of the programme. Apprentices will therefore build their calculation skills by achieving 80% by the end of level 4, and 90% by the end of level 5 and 100% by the end of level 6. All zero-credit (pass/fail) components must be passed. No compensation is available.

Reassessment of failure

A student will be allowed one reassessment opportunity per module at level 5 (year one) of their programme.

Practice Experience 1, 2 and 3 are zero-credit modules which embed the practice requirements for nursing. Each zero-credit module can be reassessed on one occasion.

However,

Maximum periods of registration

The maximum periods of registration will normally be two years on the BSc/GradCert and three years on the BSc (Hons)/GradDip.

Recognition of Prior Learning (RPL)

For non-honours students 15 credits of RPL are available at level 6. For honours students 45 credits of RPL are available at level 6.

Classification of awards

This is a level 6 programme and is therefore classified on the best 105 level 6 credits.

Where a student has studied and passed more than 120 credits, degree classification will be based on an average of the total number of credits, excluding the 30 credits with the lowest mark(s). Where a student has studied and passed less than 120 level 6 credits (due to RPL) classification will be based upon the average of the marks for all modules studied.

Passing a module/Compensation

All core module components must be passed at 40 per cent. No compensation is available.

Reassessment of failure

A student will have a maximum of 90 credits of reassessment opportunities at each level of study.

Progression between undergraduate levels of study

Students must pass all modules before progressing to the next level.

Passing a module/Compensation

All core module components must be passed at 40 per cent. No compensation is available.

The level 4 Le3(BS)-3(c)-. (BS)-3(c)-y/F2 11.0y0000Q EMC /P #d-2(e04 Tf1 0 0 1 56.64 386.35 Tm0.502 0.5

Passing a module/Compensation

All modules are must-pass modules and students must achieve a minimum pass mark of 40 per cent. No compensation is available.

Reassessment of failure

A student will have a maximum of 90 credits of reassessment opportunities at each level of study.

Students who fail SALT2201 (professional practice 2) may have only two reassessment opportunities for that module. Students exceeding this will only be eligible to continue on a route for an academic award without eligibility for state registration.

Students who fail SALT3202 (professional practice 3) due to failure in the clinical placement report completed by their clinical educator (but not the coursework assignment and clinical viva) may have only one reassessment opportunity. Students who fail SALT3202 due to failure in the coursework assignment and clinical viva may have only two reassessment opportunities. Students exceeding this will only be eligible for an academic award without eligibility for state registration.

Progression between undergraduate levels of study

1) Students may normally only proceed into year two on successful completion of all level 4 modules except students may proceed carrying one failed component of SALT1008, Introduction to phonetics and phonology, (practical phonetics component, threshold 66 per cent), providing this is retrieved by the end of the second year.

2) Students may normally only proceed into year three on successful completion of all level 5 modules except students may proceed carrying one failed component of SALT2202, clinical linguistic assessments (practical phonetics component, threshold 66 per cent), providing that this is retrieved by the end of the third year.

Progression of part-time undergraduate students

Students studying part-time must normally successfully complete all modules in each year of study before proceeding to the next except students may proceed carrying one failed component of SALT1008, introduction to phonetics and phonology (as paragraph one above), and SALT2202, clinical linguistic assessments (as paragraph two above), provided the failed component is retrieved in the next year of study.

Fitness to practise

In order to attend practice placements and to be eligible to apply for professional registration students must be in sufficiently good mental and physical health to be able to practise without risk to themselves or others. Students must notify the Clinical Placement Lead

if they experience changes to their health status which might have an impact upon fitness to practise. Students about whom there are serious concerns over professional conduct or fitness to practise may be withdrawn from practice placements during investigation of the concerns.

Students must attend for occupational health assessment if asked to do so by the programme leader or deputy. Students who experience such health issues as render them unable to practise safely and effectively may, at the discretion of the assessment board, be unable to pursue the professional programme.

Repeating an undergraduate level of study

Students are not permitted to repeat an undergraduate level of study.

Awards of the university

In exceptional circumstances it is possible for students to transfer to a non-clinical route. In this case students will be awarded an honours or non-honours degree but without the professional qualification or eligibility to apply to the HCPC for state registration or to the Royal College of Speech and Language Therapists for a certificate of eligibility to practise. The title of this degree will be BSc Human Communication. Any student in this position should discuss options with the programme leader. Awards and progression on a non-clinical route will be subject to generic regulations.

Passing a module/Compensation

All module components must be passed at 40 per cent. No compensation is available.

Reassessment of failure

A student will have a maximum of 90 credits of reassessment opportunities at each of levels 4 and 5.

Progression between undergraduate levels of study

The attendance requirement for the programme is 80 per cent attendance for each level. If a student achieves between 70-80 per cent attendances for the level, they can retrieve the failure during the reassessment period by completing additional work set by the programme team. If a student fails the attendance requirement they will automatically be transferred to the Non PQ programme.

MSc Advanced Clinical Practice B90080/B90081

The programmes incorporate a non-medical prescribing course, allowing students to legally undertake prescribing. This course has different assessment criteria from the university's regulations, which are set by the Nursing and Midwifery Council, the Health and Care Professions Council and the General Pharmaceutical Council:

- Students undertaking PRES5005 Applied Prescribing Module will have one resit opportunity for each part of the assessment (Reflection and Portfolio)
- Students undertaking PRES5006 Pharmacology for Prescribers will have one resit opportunity for both the pharmacology exam and the assignment
- Students undertaking PRES5006 Pharmacology for Prescribers will have one resit opportunity for the numeracy exam within the module. If the student fails both the first and resit attempt they will be allowed one final resit opportunity after the assessment board
- The pass mark for the pharmacology exam in PRES5006 is 80%
- The pass mark for the numeracy exam in PRES5006 is 100%
-

MSc Advanced Clinical Practice B90082

The programmes incorporate a non-medical prescribing course, allowing students to legally undertake prescribing. This course has different assessment criteria from the university's regulations, which are set by the Nursing and Midwifery Council, the Health and Care Professions Council and the General Pharmaceutical Council:

- Students undertaking PRES5005 Applied Prescribing Module will have one resit opportunity for each part of the assessment (Reflection and Portfolio)
- Students undertaking PRES5006 Pharmacology for Prescribers will have one resit opportunity for both the pharmacology exam and the assignment
- Students undertaking PRES5006 Pharmacology for Prescribers will have one resit opportunity for the numeracy exam within the module. If the student fails both the first and resit attempt they will be allowed one final resit opportunity after the assessment board
- The pass mark for the pharmacology exam in PRES5006 is 80%
- The pass mark for the numeracy exam in PRES5006 is 100%

Module assessment

MPHE5807 End Point Assessment

Irrespective of university regulations, one further opportunity for retaking one or both of the end point assessment components is allowed. Re-sit opportunities should be offered following formal confirmation of the failed assessment component(s) by the EPAO. The employer must also confirm to the EPAO that they support the apprentice in retaking the EPA. Any EPA component must be taken within three months of formal confirmation of the failed EPA. A re-sit of either component will limit the overall EPA grade to pass except where an application for extenuating circumstances has been upheld by the EPAO. Apprentices are only required to re-sit the failed component of the EPA. A further attempt at EPA cannot be used to improve a pass/merit result.

Students are allowed 2 attempts at the numeracy examination within the module. If neither of these attempts are passed the marks will be presented to the exam board as a fail. The student will then have one opportunity to pass this element of the module.

Students who fail one or more element of a module will be given one re-submission opportunity to achieve a pass grade for each element of the module.

Introduction to modules

The programme consists of 20 credit modules.

Passing a module

All module components must be passed at 50% C84080. All zero-credit (pass/fail) components must be passed.

Reassessment of failure

Students are only allowed one reassessment attempt per module.

Failure of a module due to gross professional misconduct will result in immediate dismissal from the programme.

Students must maintain contractual services with the designated service provider for the duration of the programme. If they fail to do so they will be suspended pending investigation and may be terminated from the programme.

Attendance

Each module has a 100 per cent attendance requirement for taught content. The clinical practice element has an 80 per cent attendance requirement. If a student falls below these requirements they must demonstrate that they have completed any missed work.

Awards of the university

Classification is based on the overall average mark or if students have 40 credits in the higher banding, the higher classification award will be applied.

[See Low Intensity Psychological Interventions GradCert](#)

Passing a module

All module components must be passed at 50 per cent. All zero-credit (pass/fail) components must be passed.

Students undertaking PRES 5005 Applied Prescribing Module will have one resit opportunity for each assessment component (the Reflection and the Portfolio).

Students undertaking PRES 5006 Pharmacology for Prescribers will have one re-sit opportunity for both the pharmacology exam and the assignment.

Students undertaking PRES 5006 Pharmacology for Prescribers will have one re-sit opportunity for the numeracy within the module. If the student fails both these attempts they will be allowed one final re-sit opportunity after the exam board.

The pass mark for the pharmacology exam in PRES 5006 Pharmacology for Prescribers is 80%. The pass mark for the numeracy exam in PRES 5006 Pharmacology for Prescribers is 100%.

PRES5005 and PRES5006 must be taken together and must both be passed.

Maximum periods of registration

The maximum periods of registration will normally be two years on the PG Cert and four years on the PG Dip and six years on the MSc.

Progression to second year of the programme

Students must satisfy the attendance requirement of 70 per cent for all academic modules. Students will have to re-attend the module the following year for any failed modules.

Eligibility to start postgraduate dissertation, major project and design work

In order to become eligible to start the dissertation, students must normally have passed 60 of the 120 taught credits at the first attempt.

Health and social research methods (ASCS5201) must normally be passed before the dissertation can be commenced.

Attendance

A minimum requirement of 80% engagement with the online activity / discussion board. If a student falls below these requirements they must demonstrate that they have completed any missed work.

Awards of the university

The award of the MA/PgDip with Joint Negotiating Committee (JNC) professional qualification is dependent on all practice hour
